**Corporate Training Program / Front-End Class**
Fundamental Learning Assignment - Part 5 Advanced

Advanced Assignment

Follow the steps to finish the wireframe:

1. Create a component called *Counter* that renders a button and a number. Increment the number by 1 if the user clicks on the button.
2. Renders the component 3 times on the page
3. At the top, create a button that will increment all the numbers by 1 if being clicked.
4. At the bottom, create another button that will add a Counter onto the page if being clicked.
